Optimized Workflow in Atrial Fibrillation

AZ Sint-Jan Hospital, Bruges

Welcome

The optimization of the workflow plays an important role in the efficiency and efficacy of a catheter ablation of Atrial Fibrillation procedure: from patient setup to assessment of acute isolation of the PVs, to the technology being used.

The aim of this course is to show how a standardized approach to ablation of Atrial Fibrillation can dramatically improve the procedural success rate, as well as the lab performance.

We wish you an enjoyable and instructive course!

Yours sincerely,

Nicolas Chaise

Day 1

08:45 Departure from hotel

09:00	Welcome and introduction	Prof. M. Duytschaever
-------	--------------------------	-----------------------

09:15	Ablation Index and CLOSE protocol	Prof. M. Duytschaever
-------	-----------------------------------	-----------------------

LIVE CASE 1

09:40	Live case: Paroxysmal Atrial Fibrillation	Prof. M. Duytschaever
-------	---	-----------------------

11:30	Case debrief	All
-------	--------------	-----

12:00	Technology insights	
-------	---------------------	--

12:30	Lunch	All
-------	-------	-----

LIVE CASE 2

13:00	Live case: Paroxysmal Atrial Fibrillation	Prof. M. Duytschaever
-------	---	-----------------------

15:00	Case debrief	
-------	--------------	--

15:30	Wrap up and departure from hospital	
-------	-------------------------------------	--
