# • SCIENTIFIC PROGRAMME •

Hydrocephalus is an important clinical problem affecting patients of all age and involves the accumulation of excess fluid within the brain that can be life threatening for some and produce devastating neurological effects in others.

“Hydrocephalus 2017” is the Ninth Annual Meeting of the International Society for Hydrocephalus and Cerebrospinal Fluid Disorders (ISHCSF). It will start on Saturday September 23, 2017 and conclude on Monday September 24, 2017.

This annual meeting is the largest worldwide dedicated to research into hydrocephalus and related disorders relevant to all with a dedicated interest in the hydrocephalus and intracranial pressure.
