

Agenda | December 3-4, 2018

Complex Arrhythmia Course

Hospital Saint Joseph
26 Boulevard de Louvain
13008 Marseille
France

Welcome

Complex Arrhythmia Course is dedicated to physicians that would like to improve their workflow in AF Ablation. You will benefit from interacting with a hosting faculty and can observe typical ablation strategies and outcomes as well as best practices, lab management, clinic management and practice development strategies.

The aim of this course is to provide you with all the necessary theoretical and practical knowledge to be able to treat your patients with Carto®3 technology in your daily work.

Together with the faculty, I will be happy to support you throughout this learning experience with any additional help you may need.

I wish you a very instructive course!

Yours sincerely,
Marta Góral
