

13th Advanced Deformity Symposium: What's new in AIS?

May 11-12, 2017

Overview

The 13th Spine Advanced Deformity Symposium will focus on "What is new in Adolescent Idiopathic Scoliosis?". The didactic sessions and the highly interactive discussion forums will review topics from Etiology and diagnosis, to approaches and treatment options as well as sagittal plane problems and the long term effect of surgery, by sharing experiences and solutions from the delegates and faculty.

Focus Products: Expedium Verse, Expedium

Delegate Criteria

This is an advanced symposium where the delegates should have minimum 3-5 years' experience in Spine Deformity surgery. It's mandatory for each delegate to pre-submit and present a case.
