

Agenda | September 20 -21, 2018

## Mentor® Masters' Meeting

Leiden, The Netherlands

# Welcome

Join leading industry experts for an interactive round table session to evaluate emerging trends, clinical research, and advancements in breast surgery, aimed at mitigating risk and increasing long-term patient satisfaction.

We will assess safe and effective treatment options and surgical techniques utilizing MENTOR® implants, including the new MemoryGel™ Xtra Breast Implants, and MENTOR® CPG™ Gel Breast Implants.

This program will also feature interactive discussion surrounding the management and treatment of complex breast augmentation and reconstruction cases.

*Participants are highly encouraged to bring their own complex case for peer discussion.*

Participants will visit Mentor's manufacturing facility, to observe manufacturing & quality controls, participate in hands-on experiential learning, and understand the importance of applying the strictest quality controls to ensure breast implant quality.

We look forward to welcoming you to Leiden.

Yours sincerely,

**Debbie Battat**

Professional Education Manager,  
Europe, Middle East & Africa  
Mentor  
[dbattat@its.jnj.com](mailto:dbattat@its.jnj.com)
