22ND
ANNUAL CONGRESS
OF EUROACADEMIA
MULTIDISCIPLINARIA
NEUROTRAUMATOLOGICA
EMN
25 – 27th may 2017

Dear Colleagues,

the 22nd Congress of the Euroademia Multidisciplinaria Neurotraumatologica (EMN) will be hosted in Pavia, Italy, in May 2017. The aim is to develop scientific sharing on recent methods, assessments and techniques for the treatment of patients with brain and spinal cord injuries, from the acute and neurosurgical setting to the rehabilitation and social-work activation. Specialists of different disciplines will participate to guarantee the highest level of a multidisciplinary approach.

Main topics are the updating of surgical, pharmacological, rehabilitative and clinical methods.

In particular, the congress will develop discussion on epidemiology, and state of the art of therapeutic strategies (emerging risk factors; clinical strategies in ICU and neurosurgery setting; assessment and monitoring of injuries in acute phase); on the physiopathological basis of recovery mechanisms and neuroplasticity (advanced approaches such as neuromodulation techniques, robotics for surgery and rehabilitation; telemonitoring or the telerehabilitation , neurorehabilitation outcomes, patient management and caregiver education and support).

We planned for this Congress edition, the 22nd, a joint session with the World Neurorehabilitation Federation (WFNR) to enhance the scientific sharing on rehabilitation.

The congress is going to take place in Pavia, at the Congress Center of the Salvatore Maugeri Foundation, conveniently equipped for all the scientific activities. An inviting social program is planned in the city of Pavia and surroundings to empower professional sharing and social meetings.

Caterina Pistarini
Scientific Committee

Cari Colleghi,

Il 22mo Congresso dell' Accademia Europea Neurotraumatologica (EMN) si terrà a Pavia, nel Maggio 2017

L'obiettivo del Congresso sarà quello di sviluppare e aggiornare a livello internazionale le conoscenze riguardo la presa in cura dei pazienti con cerebrolesione e mielolesione dalla fase acuta , rianimatoria e neurochirurgica , alla fase riabilitativa e al reinserimento sociale e professionale .I relatori invitati, afferenti alle diverse discipline, garantiranno la qualità del dialogo e delle conoscenze.

Gli argomenti del Congresso saranno suddivisi in diverse aree tematiche: l'epidemiologia e lo stato dell'arte delle strategie terapeutiche nelle lesioni traumatiche del Sistema Nervoso, con riferimento ai setting di terapia intensiva e neurochirurgia,i fattori di rischio, il monitoraggio clinico ed operatorio e le strategie terapeutiche della fase acuta, le basi neurofisiologiche dei meccanismi di recupero e della neuro plasticità. Verranno approfondite le nuove tecniche di riabilitazione quali la stimolazione cerebrale profonda, la stimolazione cerebrale non invasiva, i trattamenti robotici, le metodiche di teleriabilitazione , le misurazioni di outcome funzionale e l'importanza della informazione / educazione dei pazienti e del Caregiver

.Per l'edizione di questo Congresso annuale è prevista una sessione scientifica speciale in collaborazione con Colleghi e Specialisti appartenenti alla Federazione Mondiale di Neuroriabilitazione (WFNR) con lo scopo di approfondire gli aspetti riabilitativi durante tutte le fasi del trattamento del paziente con cerebro lesione e mielolesione traumatica .

L'evento scientifico si terrà a Pavia, presso il Centro Congressi della Fondazione S. Maugeri, dotato di tutti gli strumenti per le attività congressuali. È previsto un nutrito programma sociale che si svolgerà nella città di Pavia e dintorni, garantendo e facilitando le esperienze di scambio professionale e sociale tra i partecipanti.

Abstract Submission Template

-Instructions-

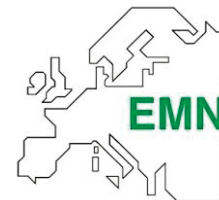

1. You need to be registered at the congress to enter into abstract submission link:
www.bquadro-congressi.it
2. Click Abstract submission button
3. Select oral or poster or both
4. Fill in the fields in lowercase letters
5. Do not insert Charts or Images into the abstract. This will cause your abstract to be rejected after submission.
6. Do not alter the fonts or size/color of the text.
7. There is a limit of 700 characters. However, depending on such variables as the amount of “white space” or use of mathematical equations, some abstracts with less than 700 characters will exceed our publication space limitations, but will be not rejected.
